Subject: soil sampling results

EPA collected soil samples from the garden at Family Star Montessori, 1331 E 33rd Ave. The results of the analyses for arsenic and lead are:

First Sample: Arsenic = 7 parts per million Lead = 223 parts per million

Second Sample: Arsenic = 14 parts per million Lead = 211 parts per million

These levels of arsenic and lead are not of concern to children or adults who may come in contact with the soil . They are within "background" concentrations for this area.
